BULKHEAD

Role-based File Access Control

What is Bulkhead?

Bulkhead solves the challenge of sharing data from secure Amazon S3 data buckets by serving files to authorized users swiftly and reliably.

- Role-based access for individuals or groups

- Rapid authentication via existing GEOAxIS profiles

- Maximum transfer speed direct from S3

- Full individual audit history

Three Simple Steps

Data Owner

1. Grant access to data storage
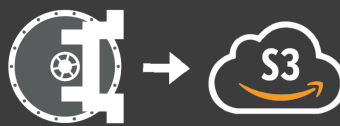

2. Create a role associated with storage

3. Add users by group or individually

User

1. Request data from Bulkhead-enabled app

2. Verify GEOAxIS credentials

3. Download data via secure link
